JOIN US THIS NOVEMBER  
FOR 7 CE HOURS

The Cornea Research Foundation of America is embarking on an ambitious research path that has the potential to dramatically change the way we approach vision correction, transplant treatments, management of those with complicated glaucoma problems and more.

One of our high-priority strategic initiatives is to provide relevant, up-to-date information to both patients and doctors on the latest advancements in treatment options. Through assisting in training doctors like you who are dedicated to improving patient care and visual outcomes we meet this goal. View a complete list of our research areas at [Cornea.org](http://Cornea.org).

- 2:30pm**—Afternoon Break/Networking
- 4:30pm**—Seminar Adjourns

## SPEAKERS AND TOPICS

### Francis W. Price, Jr., M.D.

#### **Natural History & Problem Solving:**

**Keratoconus & Fuchs' dystrophy:** Dr. Price will review how to clinically diagnose two of the most common corneal conditions, Fuchs' dystrophy and keratoconus; current treatment options from contacts and glasses, to medication and surgical intervention will be covered. (1 hr IOB/OLDPAC)\*

### Matthew T. Feng, M.D.

#### **Windows to the Soul: Anterior Segment Manifestations of Systemic Disease:**

Understanding the ocular clinical manifestations of various systemic diseases during an examination will be covered by Dr. Feng. What can be monitored, lab tests to order and when to refer out will be reviewed. (1 hr OLDPAC/IOB)\*

### Mile Brujic, O.D.

#### **Not a Dry Eye in the House!**

As one of the most common medical conditions that we will encounter in clinical practice, it is critical to have an understanding of contemporary thoughts of diagnosing and treating dry eye. This course, presented by Dr. Brujic will allow the attendee to do just that.

(2 hrs IOB/OLDPAC) 48257-AS

### Michael Sacopulos, J.D.

**Charting a Course for Success!** What could be more straightforward than a patient's medical record? The patient is seen and the optometrist records the visit. End of story, right? Medical records trigger both state and federal laws. Michael Sacopulos, J.D. will cover legal duties and areas of concern related to medical records. (1 hr IOB)\*

### Scott Sanders, M.D.

#### **Eye Movement Abnormalities: Diplopia & Nystagmus:**

Dr. Sanders provides an anatomical review of the structures key to ocular motility; specific anatomic location, brain, nerve, junction, orbit and clinical features that may be present at that location, potential abnormalities that may occur there and subsequent work-up needed to make a diagnosis. (1 hr IOB)\*

### William Townsend, O.D.

#### **Hot Topics in Ophthalmic Medications and Nutraceutical Agents:**

In this presentation, Dr. Townsend will teach the applications for currently available medications and the ever-expanding arena of nutraceuticals including vitamins, dietary products, and herbs. Widespread use of these agents has led to the realization that they can exert both harmful and beneficial effects. (1 hr OLDPAC/IOB)\*

\* Pending approval

# REGISTRATION FORM

Attendee's Name (if registering more than one OD—please make a copy of this form or include a slip of paper with necessary info)

Company (if applicable)

OE Tracker Number (Required to receive CE hours)
